

DIRU-120/8E

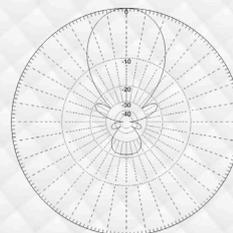

DIRECTIONAL ANTENNA YAGI 8 ELEMENTS

High-gain YAGI-type directional antenna, made of special aluminum alloy, with excellent mechanical resistance and high electrical conductivity.

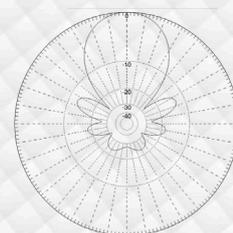

Designed to prevent the buildup of electrostatic charges on the coaxial cable.

This feature allows for greater protection of equipment and reduced noise levels.

In addition to being lightweight and easy to install, it does not require field adjustments so that its VSWR remains below 1.5:1 throughout the operating range.
